KEY RESULTS

Lactose intolerance Quantitative estimation of market potential in Kazakhstan

Prepared for:

All data shown on Lactose free target	KAZAKHSTAN	
SIZE OF	28% of urban population	
LACTOSE FREE TARGET		
	Most feel discomfort, very few identify as lactose intolerant- 5%	
MILK CONSUMPTION	Consumption of milk is lower among lactose free target than population, but the share is still rather high as the majority inside Target audience are milk consumers (KAZ 76%).	
	Most often consumed: equally throughout the day, with tea/coffee dominant	
LACTOSE EDEE TARGET DROFILE	Overall no difference vs Total population in socio-demographics	
LACTOSE FREE TARGET PROFILE	Tend to care about the nutritive value and avoid certain ingredients in their diet	
LACTOCT EDGE ANYADENESS	89% of the target aware of lactose, 52% aware of lactose free products	
LACTOSE FREE AWARENESS	Very basic knowledge about "lactose": found in milk and milk products, some people have problems digesting it.	
LACTOSE FREE CONSUMPTION	32% of the target has consumed some lactose free product (Oat products – 7%, Cottage cheese – 7%, UHT milk – 6%) and 36% are interested in trying in the future.	
	<u>Drivers: NA (low sample size)</u>	
LACTOSE FREE DRIVERS & BARRIERS	Barriers: 1) don't have a need for it, 2) prefer usual milk products	
	3) know little about the product,	
LOW LACTOSE / LACTOSE EDEF DRANDS	Spontaneous awareness: 1) Valio Eila (27%), 2) Lactel Easy Morning (23%), 3) Ajnalajyn (11%)	
LOW LACTOSE / LACTOSE FREE BRANDS	Lactel Easy Morning: Prompted awareness 75% (no1), high conversion to purchase	

STUDY DETAILS

OBJECTIVES:

To quantify:

- % of milk consumers (which milk type)
- % of people who feel unpleasant sensations after drinking milk / intolerant people
- Reasons for not consuming milk % of those who don't drink milk because of: unpleasant sensations after drinking milk, having concerns related to milk consumption in adulthood...
- Low Lactose/ Lactose Free category awareness and % of buyers,
- Parmalat Low Lactose and Valio Eila awareness and % of buyers (for Russia)
- Awareness and understanding of lactose
- · Category purchase reasons and barriers
- Category and brand habits

METHOD:

Data collection: Online via Internet panelKazakhstan: OMI (32 000+ panelists)

Target group

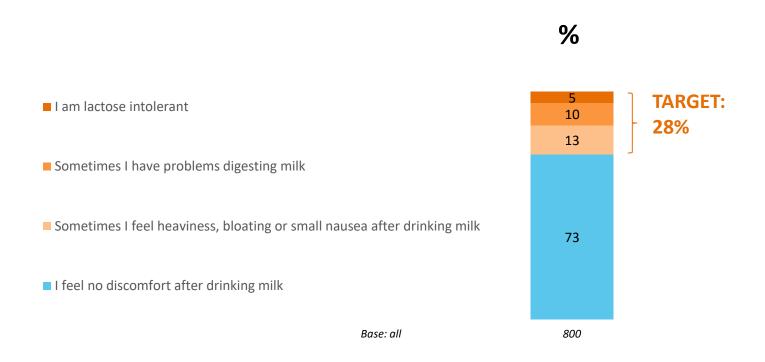

- Urban population of Kazakhstan (all cities),
- Males & Females, 20-55
- 800 interview
- Nationally representative sample
- Quotas on region/gender/age in accordance with official statistics on the country's population
- Readings on Almaty & Nur-Sultan

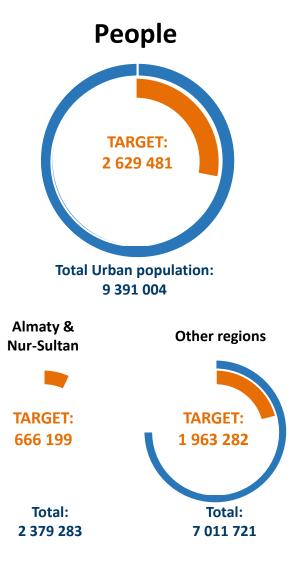

Lactose free target audience

Share of people who meet with milk digestion difficulties is estimated as high, reaching 28%.

Further we consider as Target group those who claim: I am lactose intolerant or Sometimes I have problems digesting milk or Sometimes I feel heaviness, bloating or small nausea after drinking milk.

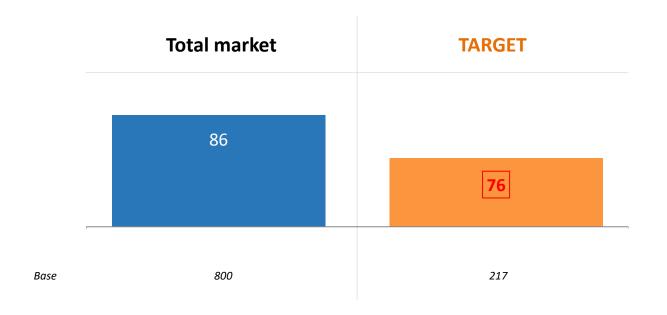

Share of milk consumers, %, past 12 months

Milk penetration among Target group is significantly lower vs. Total market.

But the share could be estimated as still high, as the majority inside Target audience are milk consumers.

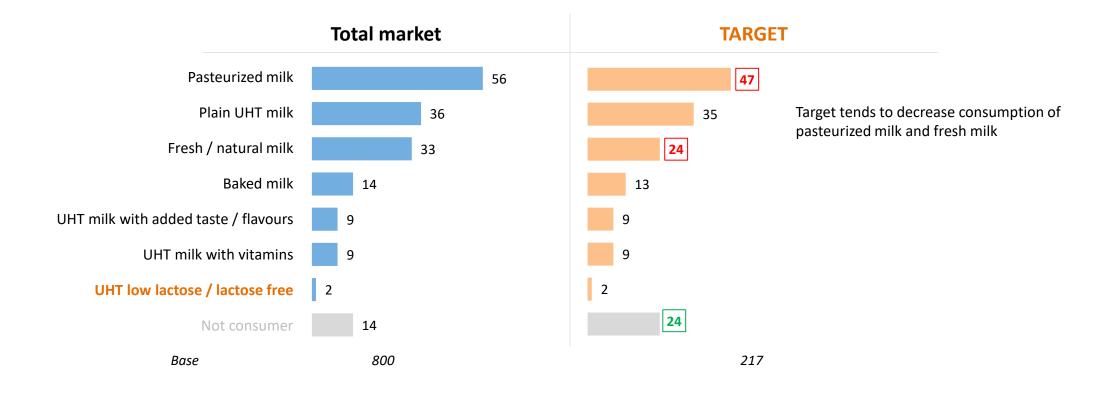

Types of milk consumption, %

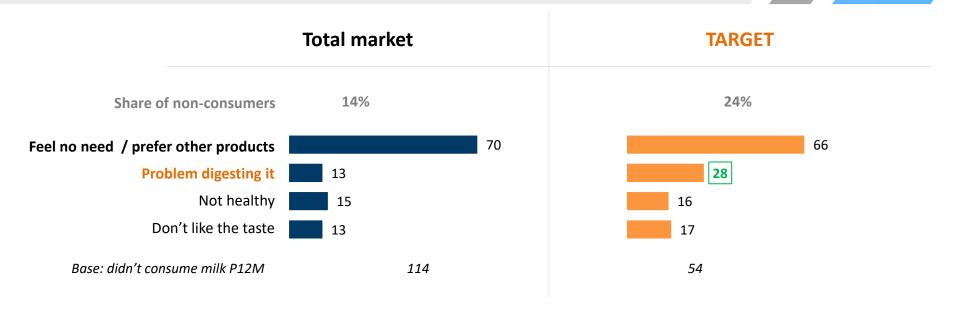

Pasteurized milk leads by share among both groups. It is followed by UHT and fresh (and both UHT and fresh are about at the same stage of popularity). Share of UHT lactose free milk is currently low. No difference in consuming UHT lactose free milk among Target vs. Total market.

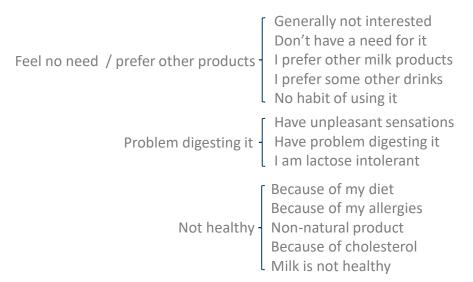

Reasons for not consuming milk, %

Decryption:

Milk consumption by day time, %

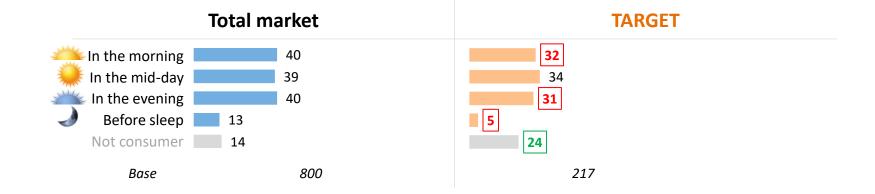

Milk consumption splits equally between day times (morning – mid-day – evening).

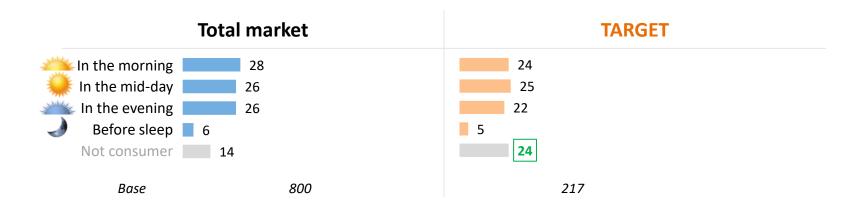

Drinking milk before sleep is the list popular.

Similar tendency among Target is observed, even though share of milk consumers is generally lower.

Usually

Most often

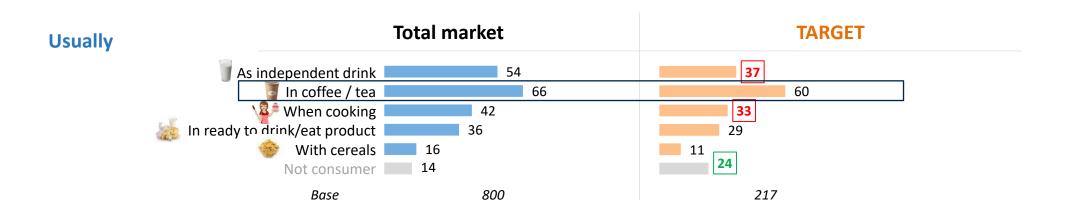

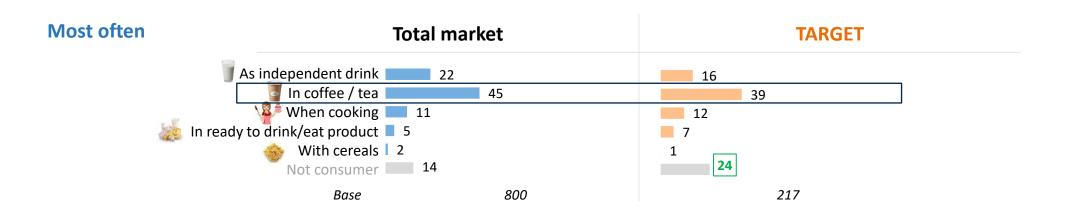

Ways of milk consumption, %, past 12 months

Drinking milk in coffee/tea leads in Kazakhstan.

Among Target, drinking milk independently is significantly less popular vs. Total market.

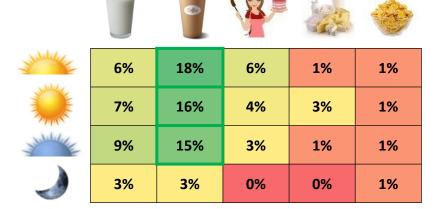

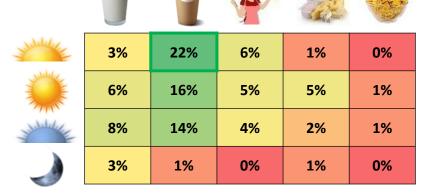

Most often Day time & Ways - overlap

Total market
